

Product Name : MEISi-2
Cat. No. : PC-20505
CAS No. : 2250156-71-7
Molecular Formula : C₁₈H₁₄N₂O₃
Molecular Weight : 306.32
Target : Other Targets
Solubility : 10 mM in DMSO

CAS: 2250156-71-7

Biological Activity

MEISi-2 (MEIS inhibitor 2) is a specific small molecule inhibitor of **MEIS1** (Meis1), significantly inhibits MEIS1 protein activity in MEIS-luc reporter assays at 0.1 μ M, modulates hematopoietic stem cell (HSC) activity.

MEISi-2 did not significantly inhibit the PBX-Luc-reporter.

MEISi-2 (0.1-10 μ M) induced MEIS dependent hematopoietic stem cell maintenance and self-renewal.

MEISi-2 downregulated MEIS target gene expression (Hif-1 α , Hif-2 α , and HSC quiescence modulators including p16, p19, p19ARF).

MEISi-2 functionally inhibited MEIS in vivo, induces c-Kit⁺ cell, Sca1⁺ cell, CD150⁺cell, LSK HSPCs, LSKCD34^{low} HSC content and LSKCD150⁺CD48⁻HSC content.

MEISi-2 was effective in vivo as evident by induced HSC content in the murine bone marrow and downregulation of expression of MEIS target genes.
