

Product Name : QN-302
Cat. No. : PC-21822
CAS No. : 2546091-70-5
Molecular Formula : C₄₅H₅₇N₇O₆
Molecular Weight : 791.99
Target : DNA Alkylator/Crosslinker
Solubility : 10 mM in DMSO

Biological Activity

QN-302 (SOP1812) is a tetrasubstituted naphthalene diimide compound binding to G-quadruplex (G4) DNA structures, shows high potency in pancreatic ductal adenocarcinoma (PDAC) cells.

QN-302 shows high affinity to hTERT G4 and HuTel21 G4 with KD values of 4.9 and 28.4 nM, respectively.

QN-302 has high anti-proliferative activity in pancreatic cancer cell lines and anti-tumor activity in several experimental models for the disease.

QN-302 also causes downregulation of the expression of the S100P gene and the S100P protein in cells and in vivo.
