

Product Name : Oclacitinib
Cat. No. : PC-22617
CAS No. : 1208319-26-9
Molecular Formula : C₁₅H₂₃N₅O₂S
Molecular Weight : 337.44
Target : JAK
Solubility : 10 mM in DMSO

Biological Activity

Oclacitinib (PF-03394197) is a potent JAK inhibitor with IC₅₀ of 10, 18, 99, and 84 nM for JAK1, JAK2, JAK3, and TYK2, respectively.

Oclacitinib (PF-03394197) does not significantly inhibit a panel of 38 other kinases when tested at 1 μM.

Oclacitinib (PF-03394197) inhibits IL-2, IL-4, IL-6, IL-13, and IL-31 with IC₅₀'s ranging from 36 to 249 nM, much less potent against erythropoietin and GM-CSF.

Oclacitinib (PF-03394197) inhibited JAK1-dependent cytokine receptor complexes involved in inflammation and pruritus, common clinical signs in canine allergic skin disease.
