

Product Name : Mavorixafor trihydrochloride
Cat. No. : PC-23419
CAS No. : 2309699-17-8
Molecular Formula : C₂₁H₃₀Cl₃N₅
Molecular Weight : 458.86
Target : Chemokine Receptor (CCR and CXCR)
Solubility : 10 mM in DMSO

Biological Activity

Mavorixafor trihydrochloride (AMD-070, AMD-11070) is a potent and selective antagonist of CXCR4 with IC₅₀ of 13 nM in a CXCR4 125I-SDF inhibition binding assay.

AMD-070 displays no significant activity (IC₅₀>10 μM) for a series of other closely GPCRs (CCR1, CCR2b, CCR4, CCR5, CXCR1, and CXCR2).

AMD-070 inhibits the replication of T-tropic HIV-1 (NL4.3 strain) in MT-4 cells and PBMCs with IC₅₀ of 2 nM and 26 nM, respectively, with noncytotoxic to cells (>23 μM).

AMD-070 exhibits good PK profiles and excellent oral bioavailability.

AMD-070 also inhibits CXCR4/SDF-1-mediated events in ALL cancer cells and transplant models.
