

Product Name : TRV120027 TFA
Cat. No. : PC-23653
CAS No. :
Molecular Formula : C₄₅H₆₈F₃N₁₃O
Molecular Weight : 1040.10
Target : Angiotensin Receptor
Solubility : 10 mM in DMSO

Biological Activity

TRV027 TFA (TRV120027 TFA) is a potent, selective β -arrestin biased ligand of angiotensin II type 1 receptor (AT1R), competitively antagonizes angiotensin II-stimulated G protein signaling.

TRV027 stimulates β -arrestin recruitment and activates several kinase pathways, including p42/44 mitogen-activated protein kinase, Src, and endothelial nitric-oxide synthase phosphorylation via β -arrestin coupling.

TRV120027 increases cardiomyocyte contractility in vitro.

TRV120027 reduces mean arterial pressure in rats.
