

Product Name : Bazedoxifene acetate
Cat. No. : PC-24542
CAS No. : 198481-33-3
Molecular Formula : C₃₂H₃₈N₂O₅
Molecular Weight : 530.67
Target : Estrogen Receptor/ERR
Solubility : 10 mM in DMSO

Biological Activity

Bazedoxifene acetate (TSE-424, WAY-140424) is a potent, orally bioavailable, BBB-penetrant nonsteroidal selective estrogen receptor modulator (SERM) with IC₅₀ of 23 nM and 99 nM for ER α and ER β , respectively. Bazedoxifene (TSE-424, WAY-140424) is a high-affinity ligand for ER α (and subsequently for ER β) with a K_i of 0.1 nM (0.3 nM for ER β) and no crossover binding to the other members of the steroid/retinoid family of nuclear receptors (e.g., androgen, progesterone, vitamin D, retinoid, rexinoid, etc.). Bazedoxifene inhibits 17 β -estradiol-stimulated proliferation in MCF-7 cells with IC₅₀ of 0.19 nM. Bazedoxifene reduces raloxifene-stimulated endometrial luminal epithelial cell and myometrial cell hypertrophy.
