## Biological Activity

AS1842856 is a novel transcription factor **Foxo1** inhibitor that potently and selectively inhibits Foxo1-mediated transactivation with IC<sub>50</sub> of 33 nM, with no significant activity on Foxo3a and Foxo4.

AS1842856 reduces glucose production through the inhibition of G6pase and phosphoenolpyruvate carboxykinase (PEPCK) mRNA levels in a rat hepatic cell line.

AS1842856 decreases fasting plasma glucose level in diabetic db/db mice.
