

Product Name : Prucalopride succinate
Cat. No. : PC-43156
CAS No. : 179474-85-2
Molecular Formula : C₂₂H₃₂ClN₃O₇
Molecular Weight : 485.9584
Target : 5-HT Receptor
Solubility : DMSO: ≥ 36 mg/mL

Biological Activity

Prucalopride succinate (R-108512) is a potent, selective 5-HT₄ receptor agonist with pK_i of 8.6 and 8.1 for 5-HT_{4a} and 5-HT_{4b}, >290-fold higher affinity for 5-HT₄ receptors than for other receptors; targets the impaired motility associated with chronic constipation, thus normalizing bowel movements; induces contractions (pEC₅₀=7.48) in the guinea-pig colon, demonstrates anti-cholinergic, anticholinesterase or nonspecific inhibitory activity and does not antagonise 5-HT_{2A}, 5-HT_{2B} and 5-HT₃ receptors or motilin, CCK1 receptors.
