

Product Name : OTS-167 hydrochloride
Cat. No. : PC-44481
CAS No. : 1431698-10-0
Molecular Formula : C₂₅H₂₉Cl₃N₄O₂
Molecular Weight : 523.8824
Target : MELK
Solubility : DMSO: ≥ 5.6 mg/mL; H₂O: 2 mg/mL

Biological Activity

OTSSP167 hydrochloride (OTS-167) is a highly potent, selective and orally active **MELK** (maternal embryonic leucine zipper kinase) inhibitor with IC₅₀ of 0.41 nM.

OTSSP167 demonstrates in vitro anti-proliferative activity against MELK-highly expressed A549 (lung), T47D (breast), DU4475 (breast), and 22Rv1 (prostate) cancer cells with IC₅₀ of 6.7, 4.3, 2.3, and 6.0 nM, respectively, with significant lower activity against HT1197 (bladder, low-MELK expression) cancer cells (IC₅₀=97 nM).

OTSSP167 shows the effectiveness on the growth of various human cancer xenograft.

OTSSP167 inhibits the phosphorylation of novel MELK substrates, significantly suppresses the phosphorylation levels of DBNL and PSMA1 in breast cancer cell lines.
