

Product Name : PFI-2
Cat. No. : PC-45488
CAS No. : 1627676-59-8
Molecular Formula : C₂₃H₂₅F₄N₃O₃S
Molecular Weight : 499.5215
Target : Histone Methyltransferase (HMTase)
Solubility : 10 mM in DMSO

Biological Activity

A first-in-class, potent and selective inhibitor of SETD7 methyltransferase with K_i app/ IC_{50} of 0.33/2 nM; shows high selectivity (>1,000-fold) for SETD7 over 18 other methyltransferases and DNMT1, 500-fold more active than enantiomer (S)-PFI-2; increases YAP nuclear localization, regulates YAP target genes, and phenocopies the effects of Setd7 deficiency on Hippo pathway signaling in murine embryonic fibroblasts.
