

Product Name : Telratolimod
Cat. No. : PC-61400
CAS No. : 1359993-59-1
Molecular Formula : C₃₆H₅₉N₅O₂
Molecular Weight : 593.901
Target : Toll-like Receptor (TLR)
Solubility :

Biological Activity

Telratolimod (MEDI 9197, 3M 052) is a novel, injectable, tissue-retained **TLR7/8** agonist that forms a tissue depot with gradual, sustained release, allowing local TLR triggering activity without systemic cytokine release; induces local innate immune activation as well as systemic, antigen-specific CD8⁺ T cell responses which suppressed distant, uninjected tumors; is currently under clinical development for use in vaccines and cancer therapy.
