

Product Name : Spautin-1
Cat. No. : PC-62189
CAS No. : 1262888-28-7
Molecular Formula : C₁₅H₁₁F₂N₃
Molecular Weight : 271.271
Target : Deubiquitinase (DUB)
Solubility :

Biological Activity

Spautin-1 is a potent, small molecule inhibitor of autophagy with IC₅₀ of 0.74 μM, inhibits USP10 and USP13 with IC₅₀ of 0.6-0.7 μM, but not USP14; promotes cell death under starvation condition and inhibits autophagic cell death, selectively promotes the degradation of Vps34 complexes, reduces the levels of PtdIns3P in cells, but is not a direct inhibitor of class III PI3 kinase activity; promotes the degradation of p53 via inhibition of USP10, which can be inhibited in the presence of MG132; sensitizes ovarian cancer cells to cisplatin and PARP inhibitor (olaparib).
