Biological Activity

Elubrixin (SB-656933, GSK656933) is a potent, selective, competitive and reversible **CXCR2** antagonist. Elubrixin inhibits CXCL1-induced CD11b up-regulation on PMNs with IC₅₀ of 26.07 nM in in vitro whole blood assay. Elubrixin is active in in vivo rodent inhalation challenge models of airway inflammation that used endotoxin and ozone to induce airway neutrophilia.
