

Product Name : Pterosin B
Cat. No. : PC-63123
CAS No. : 34175-96-7
Molecular Formula : C₁₄H₁₈O₂
Molecular Weight : 218.296
Target : Salt Inducible Kinase (SIK)
Solubility : 10 mM in DMSO

Biological Activity

Pterosin B is a potent and specific **SIK3** signaling inhibitor that suppresses SIK3 downstream cascades by up-regulating the phosphorylation levels in the SIK3 C-terminal regulatory domain.

Pterosin B shows no effect on up-regulation of MEF2 and down-regulation of CRT2 activities by SIK1 or SIK2.

Pterosin B promotes glucose production by up-regulating gluconeogenic gene expression in mouse hepatoma AML-12 cells, decreases the glycogen content and stimulates an association between PHKG2 and SIK3.
